Airport solar power generation and energy storage project

Overview

The 12-Megawatt Solar Project will Reduce Airport Energy Use at Peak Hours and Support the Port Authority's 2050 Net Zero Goal Across the Agency In Addition to Supplying Power to JFK, Nearby Low-Income Communities will Benefit with Discounted Clean Energy Produced by the Airport Solar.

New York/Houston, April 23, 2024 – TotalEnergies has begun construction of New York State's largest onsite solar generating and storage system at John F. Kennedy (JFK) International Airport in partnership with the Port Authority of New York and New Jersey (PANYNJ) and the New York Power Authority.

Construction has begun on a solar array of more than 13,000 solar panels on John F. Kennedy International (JFK) Airport's New Terminal One, part of a 12MW microgrid. A 12MW microgrid featuring solar power, fuel cells, and battery energy storage is in the works at JFK Airport's New Terminal One.

The Dulles Solar and Storage Project marks a significant milestone as it becomes the largest renewable energy initiative at a U.S. airport, aiming to produce 100 megawatts (MW) of solar energy and 50 MW of battery storage. This groundbreaking effort not only supports clean energy production but.

New York Gov. Kathy Hochul announced that the Port Authority of New York and New Jersey and the New York Power Authority have started construction of New York State's largest onsite solar plus storage project -- a solar carport canopy at John F. Kennedy International Airport. Once operational, the.
