# Analysis of the current status of the outdoor communication power supply BESS industry

## Overview

---

How is the Bess supply chain evolving?

The global BESS supply chain is evolving rapidly, marked by intense competition and strategic manoeuvres among leading players in China, Europe and the United States. Each region takes a distinct approach to cell and system manufacturing, with China firmly leading the way.

How has Bess impacted the supply chain?

The acceleration of investment and construction of BESS has led to bottlenecks along the supply chain. The high investment in the BESS industry has brought with it great opportunities and challenges while providing added security to grid infrastructure. Investment in BESS is predicted to continually grow over the course of the 2020s.

Will the Bess supply chain triple by 2030?

With the market set to more than triple by 2030 (Rho Motion, Q4 2024), the race to the top is still in contention. The global BESS supply chain is evolving rapidly, marked by intense competition and strategic manoeuvres among leading players in China, Europe and the United States.

Why do we need a Bess system?

BESS are able to store excess energy produced in periods of low demand, which can be discharged into the grid during periods of high demand. BESS operators can therefore receive financial returns for meeting surging energy needs. The acceleration of investment and construction of BESS has led to bottlenecks along the supply chain.

Will the Bess market reach 200gwh in 2024?

The BESS market has gone through a rapid period of growth. New installations are set to exceed 200GWh in 2024 across the grid and behind-the-meter market. As recently as 2022, this was a level that the market was not

forecasted to reach before 2030.

Why are Bess system integrators reducing pricing?

The increasing level of investment in BESS has prompted competition between all major integrators seeking to capitalize on the opportunity to expand market share and capitalize on demand. This has resulted in pricing reductions from all major BESS system integrators.
