Argentina s largest energy storage project

Overview

The Argentinian Ministry of Energy has launched the “AlmaGBA” Battery Energy Storage System (BESS) tender, aiming to deploy 500MW (4-hour duration, totaling 2GWh) to address electricity shortages in the Buenos Aires Metropolitan Area (AMBA).

The Argentinian Ministry of Energy has launched the “AlmaGBA” Battery Energy Storage System (BESS) tender, aiming to deploy 500MW (4-hour duration, totaling 2GWh) to address electricity shortages in the Buenos Aires Metropolitan Area (AMBA).

As part of the procurement exercise, two more projects have been added in the Buenos Aires metropolitan area (AMBA) battery program, bringing total awarded capacity to 713 MW. The Argentine Energy Secretariat has awarded two new electricity storage contracts within the AlmaGBA bidding process.

Argentina’s government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. Energy storage battery. Photo by Anna Vasileva These projects will be installed in.

Over 667 megawatts of energy storage capacity are headed for the Buenos Aires Metropolitan Area (AMBA), representing an investment exceeding half a billion US dollars. This isn’t just about avoiding summer blackouts; it’s a pivotal moment for Argentina’s energy future, and a potential model for.

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme. Nearly half of the volume submitted for the tender (1.3GW) has been awarded by the wholesale market operator CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico Sociedad).

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of.

Argentina has taken a decisive step toward modernising its electricity infrastructure with the conclusion of its first large-scale battery energy storage tender, awarding 667 MW of capacity —a significant 30% above the original 500 MW target. The competitive bidding round, part of the Alma-GBA.
