Solar developer Verano Energy has started construction on a 200MW solar PV plant in Argentina. Located in the western province of Mendoza, the San Rafael Solar park is expected to start operations by the end of 2025. The project is also located near a substation. The region is known for its high.

**\*\*The project is part of an ambitious plan that seeks to boost local production\*\* of renewable technology, reduce dependence on imports, and promote economic development with a sustainable perspective. The initiative **\*\*is led by a state energy company\*\*** that, for years, has made the sun its main.**

The Argentinian energy group YPF Luz has begun construction works on its 305 MW El Quemado I solar park located in Las Heras, Argentina. Building the first phase of the project (200 MW), which will be connected to a new 220 kV substation on the Cruz de Piedra-San Juan line, is estimated to last 18.

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar pv capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global.

Verano Energy, a renewables developer focused on Latin America, has begun construction on a 200-MW solar park in Argentina. The project expands the company's regional presence beyond its existing projects in Chile, Peru, and Colombia. The San Rafael Solar Park is expected to begin operations by.
