# Armenia Wind Solar Storage and Transmission Project

## Overview

---

Is there a solar energy supply in Armenia?

ry energy supply (2019). Nevertheless, it should be noted that over the past three years, international competitions of two large solar stations with a total installed capacity of 255 MW have been successfully held in Armenia.<sup>14</sup>. Please can you give a summary of the key renewable projects in the pipeline.

How much solar energy will Armenia produce by 2030?

capacity will reach 100 MW. The Government of the Republic of Armenia aims to increase the share of solar energy production in the total volume to at least 15% or 0.8 billion kW/h by 2030. For this purpose, solar stations with a capacity of about 1000 MW, including autonomous.

What is the most effective solar energy policy in Armenia?

use of surplus products. This policy, adopted by the PSRC and supported by the Government of the Republic of Armenia, has been the most effective, due to which the capacity of solar stations, exclusively through private investment, has increased by an average of more than 30 MW per year in the last three years reached.

What technologies are being developed in Armenia?

technologies in Armenia. Wind and geothermal energy generation is another area of development of renewables, and there are already some projects implemented or in the phase of implementation. As for plants, the remaining 60% equally at hydro and thermal power plants. The share of all other stations in the electric power system is.

How much energy does Armenia have?

from natural gas systems). In 2018, total primary energy supply (TPES) in Armenia amounted to 3.15 million toe or 1.1 toe/capita. Armenia has practically no domestic resources of fossil fuels and highly depends on fossil.

Why should Armenia invest in a power transmission network?

“To ensure affordable, reliable, and clean electricity supply for consumers, Armenia needs continued investments in modernizing the power transmission network and improving the commercial viability of the High-voltage Electric Networks of Armenia JSC, the transmission company.
