BMS battery management system has a warranty period

Overview

What is the warranty on BMS products?

All BMS products have a 90-Day Limited Warranty. Any defective product must be returned to BMS with an itemized receipt as proof of purchase. Limited Warranty applies only to products that are returned within 90-days of the in-store purchase date. If a product is deemed defective by BMS, the customer will receive a replacement product.

What is a battery management system?

Battery management systems can be installed internally or externally. Let's explore the pros and cons of each. An internal BMS is integrated directly into the battery pack itself. This means the BMS is housed within the battery casing, where it seamlessly monitors the cells and manages their performance in real time.

Why should you invest in a battery management system (BMS)?

That's why investing in a battery management system (BMS) is important. Lithium-ion batteries can last for years, depending on storage and use conditions. But with a BMS to protect them, they can last even longer.

What is a battery management system (BMS)?

A BMS ensures your batteries operate safely, efficiently, and reliably. Specifically, it monitors key parameters of your battery—voltage, current, temperature, and state of charge—and takes proactive measures to prevent major issues. These can be anything from overcharging to a thermal runaway, which can be dangerous.

Do battle born batteries have a BMS?

Note: Battle Born Batteries have an internal BMS that monitors each individual cell in the battery pack. It calculates how much current can safely go in and come out without damaging the battery. Our internal BMS ensures the

batteries always operate within a safe range.

Do you need a battery management system?

Finally, some battery management systems can connect remotely with mobile or Bluetooth. This is helpful if you have intensive battery usage that needs constant monitoring. Don't operate a lithium-ion battery without a battery management system. It's a sure fail-safe against battery mishaps that can be dangerous. But an external BMS can be costly.
