Bidirectional inverter 3 6kw

Overview

What is the Sunsynk 3.6kW Inverter?

The Sunsynk 3.6kW Inverter matches 90% of UK-sized housing and allows the user to connect to a substantial solar array up to 7kW in size. Further enlargement is available due to the MPPT facility and other inverters and corresponding solar panels can be attached if more power is required.

What is a goodwe ES series bi-directional energy storage inverter?

The GoodWe ES series bi-directional energy storage inverter can be used for both on-grid and off-grid PV systems, with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid or charge the battery, depending on the economics and set-up.

What is the array size range for the 3.6kW inverter?

For this model, the array size ranges between 1.2kW to 4.6kW. The 3.6kW inverter with the 4.68kW MPPT is perfect for the SA market. Now you can have enough solar power to charge your batteries and provide the load the whole day.

What is the array size range for the Sunsynk 3.6kW hybrid inverter?

The Sunsynk 3.6kW hybrid inverter is ideal for small-scale AC applications. For this model, the array size ranges between 1.2kW to 4.6kW and it has several software features common with our larger models.

What is a bi-directional inverter?

A bi-directional inverter can convert direct current into alternating current and vice versa. This means it can charge or discharge batteries at the same rated power.

What is a livoltek hybrid inverter?

Efficiency Livoltek hybrid inverter: Compact, safe & efficient for solar + storage, with backup power & smart energy management for homes & businesses.
