Tesla has signed its first deal to build a grid-scale battery power plant in China. The U.S. company posted on the Chinese social media service Weibo that the project would be the largest of its kind in China when completed. Tesla said its battery factory in Shanghai had produced more than 100.

Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a significant step in the U.S. automaker's global energy strategy. The deal comes at a time of tense U.S.-China trade relations, which worsened after President Donald Trump imposed sweeping.

For this facility, the company will use batteries coming from Tesla's Shanghai Megapack factory, launched earlier this year. The plant will help create a Zero-Carbon grid in Shanghai. Daniela Morales Soler, Published 07/23/2025 . Unreal Engine 5's finest hour?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology. The agreement, reported by Chinese financial media outlet Yicai on Friday, marks a major milestone for Tesla's energy.

This initiative involves the construction of the company's largest-ever energy storage facility, a move that comes as the nation's cities face increasing pressures to meet their growing electricity demands. The project, which marks Tesla's first large-scale energy storage plant in mainland China.

Tesla has signed its first agreement to develop a grid-scale battery storage power plant in China, a project that will become the largest of its kind in the country upon completion. The \$556 million deal, first reported by Chinese media outlet Yicai and confirmed by Tesla on Weibo, was signed with.
