Cadmium Telluride solar Curtain Wall Manufacturer

Overview

What is cadmium telluride (CdTe) solar panels?

PV array made of cadmium telluride (CdTe) solar panels Cadmium telluride (CdTe) photovoltaics is a photovoltaic (PV) technology based on the use of cadmium telluride in a thin semiconductor layer designed to absorb and convert sunlight into electricity.

What is cadmium telluride PV?

Cadmium telluride PV is the only thin film technology with lower costs than conventional solar cells made of crystalline silicon in multi-kilowatt systems.

Where are cadmium telluride panels used?

Cadmium Telluride panels are used in several locations around Australia including this one at Weipa and perform better in warm and humid conditions. (Supplied: FirstSolar)
