# Cape Verde Energy Storage Power Station Installation

## Overview

---

The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's.

The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's.

This flagship project supports Cabo Verde's transition to clean energy by implementing a series of interconnected electricity generation, transmission, and storage projects under the National Electricity Masterplan (2018-2040). The central component is a pumped storage facility on Santiago, the.

The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's electricity production.

a sustainable power plant will be built on each island. To realise these change Cape Verde partly receives subsidies from the European Union (GSEP) for the island of São Vicente, Cape Verde. Formulated as an optimisation problem with hourly resolution, the GSEP minimises investment.

The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's electricity.

Welcome to Cape Verde, where 500,000 people across 10 islands are rewriting the rules of energy independence. With solar radiation levels hitting 6-8 kWh/m<sup>2</sup> daily (enough to roast a lobster on a solar panel, hypothetically speaking), this nation is turning its geographic challenges into a clean.

During the presentation of the project, Cape Verde's National Director for Industry, Trade and Energy, Rito &#201;vora, announced that the energy storage centre is scheduled to be operational by 2030, with the aim of injecting 7% of renewable energy into the national public grid and 18% into that.
