# Centralized procurement of energy storage batteries

## Overview

---

Similar to an MSA, the CRA will typically include master terms and conditions governing the sale and purchase of batteries and provide buyers with guaranteed availability of batteries for the supplier's pipeline for a specified period of time.

Similar to an MSA, the CRA will typically include master terms and conditions governing the sale and purchase of batteries and provide buyers with guaranteed availability of batteries for the supplier's pipeline for a specified period of time.

AB 1373's central procurement will operate distinctly from and complementary to current requirements for energy providers in IRP, such as existing procurement under D.21-06-035, D.23-02-040, and D.24-02-047, as well any future IRP procurement requirements.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets.

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

California PUC has authorised centralised strategy for procuring long-lead-time resources, including long-duration energy storage (LDES).
