# Chad home solar system

## Overview

---

Does Chad have a solar sector?

Chad's solar sector is still in its infancy. According to figures from the International Renewable Energy Agency (IRENA), the country's cumulative solar capacity stood at 2 MW at the end of last year, the same figure reported since 2021. Will a solar PV plant be a 'pioneering project' in Chad?

The European Investment Bank (EIB) described the solar PV plant as a "pioneering project" that "will help liberalise the energy sector, and mobilise private investment in Chad." It is calculated that the cost of electricity will be less than half the current cost of power following the project.

How much will Chad spend on solar power?

Chad plans to raise \$1.1 billion to add 886 MW of power capacity, the majority of which is expected to be solar. Chad is aiming to deploy 520 MW of new solar by the end of the decade. The target forms part of the country's national development plan, Chad Connection 2030, which launched earlier this year.

How much solar power will Chad have in 2024?

The electricity strand of the development program sets a goal of 886 MW of additional installed power by the end of the decade, including 520 MW of solar. The new power installations are expected to take the share of renewable energy in Chad's generation mix to between 20% and 30%, up from 9% in 2024.

How much money does Chad need to invest in electricity?

Chad's Ministry of Finance, Budget, Economy and Planning estimates \$1.1 billion in investments will need to be mobilized to expand electricity production and distribution and modernize electricity networks.

How poor is Chad in 2023?

In 2023, extreme poverty across the country was recorded at 35.4%. Energy is scarce and unreliable across Chad. Only 4% of the population has access to electricity. Currently, traditional wood fuel is the primary source of energy consumption across the country.
