Communication Green Base Station Autumn Inspection Plan

Overview

What is a base station inspection?

The changes being experienced in weather conditions and the aging of materials may cause damage to the base station including toppling of the tower body or antenna, cable breakage, structural corrosion, etc. Timely and periodic inspections are necessary for the network operators. The typical base station inspection (BSI) services include:.

What is a base station tower inspection?

The personnel climb the base station tower to perform close-range inspection on the tower body, antenna, feeder, bracket and other components, which is a long-term, high-intensity and high-altitude operation. Low efficiency and high cost.

How do I communicate a project plan to a USFWS field office?

Communicate project plans to nearest USFWS Field Office. Co-location. Co-locate communications equipment on existing communication towers or other structures (e.g., billboard, water and transmission tower, distribution pole, or building mounts). This recommendation is intended to reduce the number of towers across the landscape. Placement.
