# Communication base station box-type substation model

## Overview

---

Who makes the prefabricated box type substation?

The prefabricated box type substation (compact substation/package substation) is manufactured by Rockwill Electric in China. It meets IEC1330 standard and IP3X protection grade. The compact substation is adaptable to any harsh environments and being installed easily. We support customization for your special requirements. Contact us for your needs.

What is a box transformer substation?

European and American box transformer substation - 2 - - European and American box transformer substation - HV/LV complete set - 1 - Combined type transformer substation General Combined type transformer substation is a kind of complete set product integrating voltage switch equipment and transformer with LV distribution equipment.

What is a box-type substation?

It is a high-voltage switchgear, distribution transformer and low-voltage power distribution device arranged in three different compartments, through the cable or bus to achieve electrical connection. 2.2. Technical characteristics of box-type substation.

What is intelligent box substation?

This series of intelligent box substation is one optimized combination of complete intelligent power supply and distribution integrated device consisting of high voltage unit, power transformer, low voltage unit, metering unit and intelligent system, etc.

What are the components of a box-type transformer substation?

The main components found within a box-type transformer substation include transformers, medium-voltage switchgear, low-voltage switchgear, protection devices, and auxiliary equipment. These components are meticulously

arranged to ensure optimal functionality and ease of maintenance.

Why should you choose a box-type transformer substation?

The sturdy enclosure effectively isolates high-voltage components, preventing accidental contact and minimizing the risk of electrical hazards. Moreover, box-type transformer substations can be equipped with sophisticated fire detection and suppression systems, ensuring rapid response and containment of any fire incidents.
