

A-Core Container

Comoros road solar power system

Overview

Located on a 50,000 m² site, the solar power plant is equipped with 10,560 solar panels. With a capacity of 6.3 megawatts-peak, the plant produces approximately 10 gigawatt-hours per year. This energy is distributed to several localities, including Shomoni, Vwadju, and Moroni, via a 17 km power line.
