# Construction of a large-scale energy storage project in Saint Lucia

## Overview

---

Saint Lucia is preparing to launch a call for proposals for a 10 MW solar project coupled with a 13 MW battery energy storage system. The project, which will be strategically located at the Hewanorra International Airport in Vieux Fort, is slated for tender in 2025.

Saint Lucia is preparing to launch a call for proposals for a 10 MW solar project coupled with a 13 MW battery energy storage system. The project, which will be strategically located at the Hewanorra International Airport in Vieux Fort, is slated for tender in 2025.

In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project—a 10 MW photovoltaic installation paired with a 26 MWh lithium-ion battery energy storage system (BESS). The project, set to be tendered later this year.

Electric utility company St Lucia Electricity Services is set to tender a 10 MW solar project with 13 MW battery energy storage later this year. St Lucia Electricity Services (LUCELEC) plans to tender a 10 MW solar plus storage project in St Lucia. According to an announcement released by the utility.

Electric utility company St Lucia Electricity Services is set to tender a 10 MW solar project with accompanying battery energy storage later this year. St Lucia Electricity Services (LUCELEC) is planning to tender a 10 MW solar project in Saint Lucia. According to a notice posted by the utility.

Saint Lucia is set to take a major leap in its renewable energy journey, planning to launch a tender in 2025 for a 10 MW solar project paired with a significant 13 MW of battery energy storage. This initiative is a cornerstone of the island's strategy to slash its reliance on volatile fossil fuel.

Construction of a large-scale energy storage project in Saint Lucia isn't just about technology – it's about solving real-world energy challenges. Let's break down who benefits: Think of energy storage as an insurance policy against blackouts. The island's unique position allows: Nevis' 2022.

The CARICOM Secretariat's renewable energy project gives effect to the CARICOM Energy Policy which envisions, *inter alia*, the sustainable and secure energy supplies through diversification of energy sources; the accelerated deployment of renewable and clean sources of energy supplies towards.
