

A-Core Container

Containerized emergency power generation

Overview

A containerized genset is a diesel or gas-powered generator that is housed within a specially designed ISO shipping container. This format offers a portable, weatherproof, and secure power generation unit that is ideal for a wide range of industrial, commercial, and emergency backup.

A containerized genset is a diesel or gas-powered generator that is housed within a specially designed ISO shipping container. This format offers a portable, weatherproof, and secure power generation unit that is ideal for a wide range of industrial, commercial, and emergency backup.

Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user. That's why we intentionally made these units easily configurable to the needs of any application, from rental to disaster relief to mining — with a whole.

That is why earlier this month, Cummins Power Generation expanded the release of their fully integrated containerized generator sets Centum™ Force, to serve 50Hz markets around the world. Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for.

Emergency Power Containers, also referred to as containerized solar energy systems or foldable PV storage containers, have become the go-to solution for disaster recovery zones, off-grid campuses, and mobile telecom networks. These solar-integrated backup power units combine photovoltaic.

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs. Our.
