

A-Core Container

Containerized silent self-starting power generation

Overview

The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated.

The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated.

Our Container Type Diesel Generators are engineered for portability and reliability. Designed with superior noise reduction, advanced air intake systems, and a heavy-duty chassis, these generators provide consistent performance across multiple applications, ensuring stable, silent operation in both.

A containerized generator set represents a comprehensive power solution that combines reliability, mobility, and efficiency in a single, standardized package. These systems integrate a diesel or gas-powered generator within a specially designed shipping container, creating a self-contained power.

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs. Our.

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, our genset containers offer optimal performance in various site conditions. By maintaining.

Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a

flexible design. Developed in-house based on our legacy of technological innovations.

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers. The larger footprint of these units allows for more versatility from a manufacturing specification standpoint — we can easily equip your gen set with greater levels of sound.
