# Current price of energy storage power in Estonia

## Overview

---

You've probably noticed the headlines: Battery energy storage system (BESS) prices in Tallinn have fallen 45% year-over-year, with recent projects hitting €0.11/Wh ( $\approx$  \$0.12/Wh). How much does electricity cost in Estonia?

A paid subscription is required for full access. In September 2024, the average wholesale electricity price in Estonia amounted to 84 euros per megawatt-hour. Between January 2021 and August 2022, electricity prices in the Baltic country increased by nearly seven-fold, reaching more than 360 euros per megawatt-hour in the latter month.

Why do Estonians have electricity plans?

Most Estonians have electricity plans linked to the current spot price, enabling them to respond to hourly price fluctuations and manage their consumption more efficiently. Estonia is an active participant in the European Union's electricity market. This integration is pivotal for the country's energy policy and market dynamics.

Is Estonia part of Nord Pool's open electricity market?

Estonia is part of Nord Pool's open electricity market together with Norway, Sweden, Finland, Denmark, Latvia and Lithuania (see map). In the open electricity market (power exchange), the price of electricity is formed as a result of supply and demand. There is at least one price area in each country, in a larger country there may be several.

Is Estonia a pan-European electricity market?

Estonia is part of the pan-European electricity market, where electricity trading takes place through power exchanges. The aim of the power exchange is to provide market participants trading electricity with a short-term, planned and standardised trading opportunity.

Why is energy important in Estonia?

stocks of energy products, imports and exports. In Estonia, a large share of energy is still produced from non-renewable resources such as oil shale. At the same time, renewable energy is receiving more attention in the world and in Estonia – it is necessary to make sure that natural resources are preserved for future generations as well.

How much energy does a shower save in Estonia?

As Estonia continues to evolve its energy sector, it remains committed to sustainability, efficiency, and regional cooperation. With the energy-saving shower, you can save up to 50% energy compared to standard shower heads. Or you can shower half the time. With the electricity price today in Estonia you can save 0.64 € for each shower.
