Cairo, Egypt, June 15, 2025 – IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to.

Dubai-based developer Amea Power has agreed to build a 1 GW solar plant with a 600 MWh battery energy storage system (BESS) and an additional 300 MWh BESS. Meanwhile, Norwegian developer Scatec ASA has signed a 25-year power purchase agreement (PPA) for a 1 GW solar array and 100 MW/200 MWh BESS in.

The company has signed Capacity Purchase Agreements to develop the first standalone battery energy storage stations in Egypt. There will be a 500MWh BESS project located in Zafarana and a 1,000MWh BESS project located in Benban. These projects will enhance grid stability and enable greater.

China's Ambassador in Cairo Liao Liqiang said that Chinese companies have successfully completed Egypt's first fully integrated photovoltaic (PV) energy storage project, with a capacity of 300 megawatt-hours, in Aswan Governorate. The project was fully connected to and operational on the national.

Recently, the Kom Ombo 500 MW PV Expansion and 300 MWh Energy Storage Project—Egypt's largest standalone energy storage project, surveyed and designed by the Southwest Electric Power Design Institute Co., Ltd. of China

Power Engineering Consulting Group—was put into commercial operation, marking a.

Dubai-based AMEA Power has begun installing the first solar panels at its 1,000-MW solar power project with a 600-MWh battery system in Egypt's Benban area of Aswan, saying it will become Africa's largest integrated solar and storage project. Author: Tom Brewster Photography. License: Creative.
