How many states have energy storage projects under construction?

The need for energy storage resources continues to be strong across the country, as 31 states currently have energy storage projects under construction.

How is the energy storage industry preparing for a grid-scale energy storage supply chain?

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply chain, building or expanding more than 25 manufacturing facilities for grid-scale energy storage. With today’s investment commitment, the industry has announced plans to rapidly expand ongoing efforts.

What does ACP's \$100 billion commitment to domestic energy storage look like?

The industry's \$100 billion commitment to support domestic energy storage production "demonstrate [s] what success can look like," ACP CEO Jason Grumet said in the briefing. Right now, he added, many industry players are in a holding pattern until more clarity develops around tax and trade policy.
