Estonia s Taiyang Energy Storage Power Station

Overview

The €100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh. How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided €5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How many energy companies are there in Estonia?

The six companies are Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia, and three out of the ten are heat storage projects, with the remainder for storing electricity.

How will a solar energy storage facility work in Estonia?

The proposed facility is planned to be installed in Ida-Viru county in Estonia's northeast. It will provide one hour of storage capacity, during which it will release electricity equal to the consumption of around 150,000 households. It will enable the storage of solar power produced by 2,500 residential installations for over two hours.

What are Estonia's networking opportunities?

Our networking opportunities have been described as second to none by industry professionals. Estonia has provided €5.2 million in grants for energy storage projects, including an 8MWh battery storage unit from Eesti Energia.

Who is Eesti Energia?

Eesti Energia is a state-owned utility operating in Estonia but also in abroad. Image: Eesti Energia. A state agency in Estonia has provided €5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia.
