Fiji Grid Energy Storage

Overview

How can Fiji provide universal electricity access?

Fiji aims to provide universal electricity access through the Fiji Rural Electrification Fund. This goal requires significant investment in: Decentralised solar and mini-grid systems. Micro-hydropower projects for remote communities. Energy storage solutions to enhance reliability.

What is the energy demand in Fiji?

The energy demand in Fiji is steadily increasing, driven by population growth, economic development, and a push toward industrialisation. Urban centres such as Suva and Nadi account for the majority of energy consumption, while rural areas often depend on decentralised and off-grid solutions.

How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.

Why is Fiji's energy sector a long-term priority?

The resilient development and diversification of Fiji's energy sector is a long-term priority for the Fijian Government due in part to rising national energy demand, volatile oil prices, ageing energy infrastructure, and the intensifying impacts of climate change and disaster events on Fiji's infrastructure, environment, people, and economy.

Where does Fiji use the most energy?

Urban centres such as Suva and Nadi account for the majority of energy consumption, while rural areas often depend on decentralised and off-grid solutions. The Fijian government has set a bold target to achieve 100% renewable energy by 2036, as outlined in the National Energy Policy (NEP).

How does Fiji generate electricity?

Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels. The growth of Fiji's land transport sector has been largely concentrated around growing urban centres.
