Gabon solar New Energy Storage

Overview

Gabon's Ogooué River Solar Project isn't just slapping panels on roofs. They're pairing 80MW of solar with lithium-ion batteries that could store enough juice to charge 3 million smartphones daily.

Gabon's Ogooué River Solar Project isn't just slapping panels on roofs. They're pairing 80MW of solar with lithium-ion batteries that could store enough juice to charge 3 million smartphones daily.

A Central African nation where elephants roam freely and 90% of the land is covered in rainforest. Now imagine this biodiversity champion leapfrogging traditional power grids like a tech-savvy kangaroo. That's Gabon's energy revolution in a nutshell. At the heart of this transformation?

Energy.

Under the leadership of the President of the Transition, the company Solen, leader in the field of renewable energies, announces the completion of the largest solar power plant, to date, in Central Africa. This infrastructure, whose official reception is scheduled for September 28, could power up.

The global residential solar storage and inverter market is experiencing rapid expansion, with demand increasing by over 300% in the past three years. Home energy storage solutions now account for approximately 35% of all new residential solar installations worldwide. North America leads with 38%.
