Georgia New Energy solar Panels

Overview

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Will Georgia Power Buy Back solar energy?

However, Georgia Power will buy back the excess energy a solar panel system creates at a rate less than the retail cost of energy. The Georgia Environmental Finance Authority Solar Program is renowned as one of the state's top incentives for fostering the growth of large-scale renewable energy projects.

Are solar panels a good investment in Georgia?

The popularity of solar power in the Peach State is projected to keep growing thanks to the state's abundant sunshine. And with the federal solar tax credit at 30%, there's never been a better time to install a solar panel system in your Georgia home. We have compiled a list of the top-rated solar providers in Georgia to help you search.

Does Georgia have a solar rebate program?

As of January, Georgia doesn't have any local incentives or rebate programs.

However, Georgia Power will buy back the excess energy a solar panel system creates at a rate less than the retail cost of energy.

Should you switch to solar energy in Georgia?

If you live in Georgia, you may want to take advantage of the state's clear and sunny skies by making the switch to renewable energy in the form of solar panels. While using solar energy in Georgia is definitely possible, because it isn't quite as common in the state, there are fewer local incentives to make the switch.
