German container battery energy storage system

Overview

According to official information from RWE, the project represents a total investment of approximately €230 million and will build a large-scale battery storage system with 400 megawatts of power capacity and 700 megawatt-hours of energy storage capacity.

According to official information from RWE, the project represents a total investment of approximately €230 million and will build a large-scale battery storage system with 400 megawatts of power capacity and 700 megawatt-hours of energy storage capacity.

On October 29, 2025, German energy giant RWE held a groundbreaking ceremony for Germany's largest battery storage project at the Gundremmingen energy site in Bavaria. Bavaria's Minister President Markus Söder and RWE CEO Markus Krebber jointly attended this historic moment. Just four days earlier.

Eco Stor says construction has begun on a 300 MW/714 MWh battery storage facility in Förderstedt, Saxony-Anhalt, now the largest such project under development in Germany. From ESS News RWE briefly held the record for Germany's largest battery storage facility under construction with its 400 MW /.

RWE is building Germany's largest battery storage facility to date at the Gundremmingen energy site. The 400-megawatt plant will have a storage capacity of 700 megawatt hours and will use the nuclear power plant's existing grid connection, which is currently being decommissioned. RWE is investing.

German-Norwegian power storage systems provider Eco Stor has started the construction of a 300-MW/714-MWh battery energy storage facility in central Germany. Energy storage battery. Photo by Anna Vasileva The system will be located in the Foerderstedt district in the Stassfurt municipality and will.

RWE has started construction of Germany's largest battery energy storage system (BESS) at the Gundremmingen energy site in Bavaria. The 400 MW

plant will offer a storage capacity of 700 MWh and leverage the existing grid connection of the nuclear power plant, which is currently being decommissioned.

The energy company plans to build a large 400 MW battery energy storage system near the border between Bavaria and Baden-Württemberg, southern Germany, along with a new solar park scheduled for construction next year. A gas-fired power plant is also planned for the area. RWE demolished the cooling.
