Germany s new solar power generation system

Overview

Germany introduced its in 2000 and it later became a model for solar industry policy support in other countries. As of 2012 , the feed-in tariff costs about €14 billion (US\$18 billion) per year for and solar installations. The cost is spread across all rate-payers in a surcharge of 3.6 €ct (4.6 ¢) per kWh (approximately 15% of the total domestic.
