Holland Wind and Solar Storage

Overview

Where is the Hollandse KUST Noord offshore wind farm located?

The Hollandse Kust Noord offshore wind farm, operated by Crosswind, is located 22km offshore in the Dutch North Sea and is the location where this offshore solar innovation will be operating.

Does crosswind have an offshore solar project?

“CrossWind is proud to report significant progress in our offshore solar project,” says Jeroen van Loon, Offshore Solar Project Manager, CrossWind. “The successful installation of the anchors marks a key milestone in the realization of this pioneering offshore solar concept, surrounded by the wind turbines of Hollandse Kust Noord.

Why should we support the offshore solar project?

The offshore solar project wishes to thank all partners and stakeholders for their support to our team for achieving this. Together, the way for a renewable energy future that enables energy security without competition for land use is being established.

When will the first offshore solar farm be installed?

Leiden/The Hague, The Netherlands; 20 th of May 2025 - Offshore installation works have been successfully completed for the anchoring system of the first offshore solar farm in the world to be installed within an offshore wind farm.
