# Home energy storage battery installation location

## Overview

---

Learn how integrators choose the best location for residential solar batteries—garage, basement or outdoor enclosure—while meeting NFPA 855, EN 62619 & AS/NZS 5139 requirements. How do I install a battery storage system?

install battery storage systems  
**INSTALL YOUR SYSTEM**  
The first thing to do when having a battery storage system installed is to ask to see the installer's Clean Energy Council Accredited Installer card. This shows that the install.

Should you install a solar battery in your home?

When it comes to residential energy storage, solar battery installation isn't just about connecting wires and flipping a switch. The location of your battery can significantly influence safety, performance, and lifespan—especially for integrators and system developers seeking long-term value and compliance.

Can a battery energy storage system be installed outside?

Outdoor installation can include an outbuilding not intended for habitation, detached or separated by a main wall with a minimum fire performance of REI 120 to BS EN 13501. If a battery energy storage system (BESS) is installed on the external wall of a building, it should not compromise the fire performance of the external wall.

How long does it take to install a battery storage system?

Who is qualified to install your battery storage system? The installation process for a battery storage system is usually very straightforward and only takes around 1-2 days (unless you are having a large system installed).

Can storage batteries be installed indoors?

When it comes to installing storage batteries, the first preference is to install them outdoors. However, if outdoor installation is not feasible, indoor installation is permissible under certain conditions: The location should not be

precluded by section 6.5.5. The location should have ventilation as per section 6.5.4.

Where should storage batteries be located?

The ideal location for storage batteries is outside dwellings and away from rooms used for living. If outdoor placement is not feasible, there are basic requirements for indoor locations housing storage batteries. These include: Ensuring batteries are separated from habitable rooms and escape routes by appropriate fire compartmentation.
