# How long and wide are solar panels

## Overview

---

Residential solar panels consist of around 60 solar cells and are roughly 5.5 feet long and 3 feet wide. Solar panels usually weigh about 40 to 50 pounds. What are the different sizes of solar panels?

There are 3 standardized sizes of solar panels, namely: 60-cell solar panels size. The dimensions of 60-cell solar panels are as follows: 66 inches long, and 39 inches wide. That's basically a 66×39 solar panel. But what is the wattage?

That is unfortunately not listed at all. 72-cell solar panel size.

How big is a commercial solar panel?

A commercial solar panel, such as those you would see on top of a warehouse or hospital, measures about 78 inches (6.5 feet) by 39 inches (3.35 feet). Solar panels comprise smaller individual photovoltaic (PV) cells. These solar cells normally come in the same standard size of 156 mm by 156 mm, approximately 6 inches long and 6 inches wide.

How big is a 60 cell solar panel?

On average, 60 cell solar panels are 65 inches (1.65m) long, 40 inches (1m) wide, and about 1.5 inches (38mm) thick. The area of a 60 cell solar panel is generally about 18 ft<sup>2</sup> (1.68m<sup>2</sup>). The average length, width, and thickness of a 72 cell solar panel are 79 inches (2m), 40 inches (1m), and 1.5 inches (38mm) respectively.

What are the dimensions of a residential solar panel?

In general, the length of residential solar panels is usually between 65 inches (1.65m) and 79 inches (2m), their width is between 39 and 41 inches (around 1m). The area of a residential solar panel is between 18 ft<sup>2</sup> and 22 ft<sup>2</sup>. The following section explains the different types of residential solar panels and their dimensions.

How thick is a solar panel?

The thickness of a solar panel too typically ranges between 1.25 inches and 1.6 inches and may vary depending on the manufacturer. A commercial solar panel, such as those you would see on top of a warehouse or hospital, measures about 78 inches (6.5 feet) by 39 inches (3.35 feet). Solar panels comprise smaller individual photovoltaic (PV) cells.

How big is a 72 cell solar panel?

The average length, width, and thickness of a 72 cell solar panel are 79 inches (2m), 40 inches (1m), and 1.5 inches (38mm) respectively. On average, the area of a 72 cell solar panel is 22 ft<sup>2</sup> (2m<sup>2</sup>). Another type of residential solar panels are solar panels with half-cut solar cells.
