The type of solar panel repair is a key cost driver, with cracked or broken panels costing $120 to $550, wiring repairs ranging from $100 to $400, and inverter replacement costing from $150 to $3,000. Roof-related work can add significant expense, with leak fixes costing $360 to $1,550 and hail. How much do solar batteries cost?

The guide below shares the best solar batteries and installation fees, plus their long-term savings potential. Solar batteries cost an average of $10,000–$19,000 in addition to installation costs. You may need multiple batteries to power your whole house with solar batteries.

How much does solar panel repair cost?

Solar panel repair costs $851 on average, but ranges between $230 and $1,503 depending on the type of damage and your specific system. On average, solar panel repair costs $851 to repair solar panels, but the level of damage can put these costs between $230 and $1,503.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Are solar batteries worth it?

Homeowners often find that solar batteries are worth it for energy security — even if they're not worth it financially. Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation.

How much does it cost to replace a solar inverter?

If it's damaged, you may need to replace it. The cost to replace a solar inverter is $800 to $2,500 for a string inverter or $150 to $350 for a microinverter. Some solar systems come with a battery. Like all batteries, the ability to charge will eventually diminish. If you need to replace your solar battery, expect to spend $300 to $15,000.

Does a solar energy system pay off the cost of a battery?

Based on our 700+ hours researching the best solar companies, a solar energy system pays off the cost of adding a battery in 5–15 years. Added savings from federal tax credits, backup power during grid outages, and additional energy savings from stored power could help justify the cost of these systems.
