# Hungary s new energy storage power source

## Overview

---

Swiss energy company MET Group has inaugurated the largest stand-alone electricity storage system in Hungary's history. The new installation, located at the Dunamenti power plant in Százhalombatta near Budapest, has a rated power output of 40 MW and an energy storage capacity of 80.

Swiss energy company MET Group has inaugurated the largest stand-alone electricity storage system in Hungary's history. The new installation, located at the Dunamenti power plant in Százhalombatta near Budapest, has a rated power output of 40 MW and an energy storage capacity of 80.

MET Group, a Switzerland-based European energy company, has inaugurated Hungary's largest standalone battery energy storage system (BESS) at the Dunamenti Power Station in Százhalombatta. The facility features a nominal power output of 40 MW and a storage capacity of 80 MWh, enabling a 2-hour.

IPP MET Group has put a 40M/80MWh BESS in Hungary into commercial operation, deployed using technology from Huawei. The 2-hour battery energy storage system (BESS) is the largest in Hungary, Switzerland-headquartered MET Group said, deployed at its Dunamenti thermal power plant in Százhalombatta.

Swiss energy company MET Group has inaugurated the largest stand-alone electricity storage system in Hungary's history. The new installation, located at the Dunamenti power plant in Százhalombatta near Budapest, has a rated power output of 40 MW and an energy storage capacity of 80 MWh. The.

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. The new 40 MW / 80 MWh system, installed at the Dunamenti gas power plant near Budapest, is the biggest of its kind in the country.

European energy company MET Group has inaugurated its 40-megawatt battery storage system in Százhalombatta, Hungary, indicating a strong push toward renewable energy for the region. The Dunamenti Power Plant is home to this new project, which builds on an existing 4-megawatt facility that was.
