India pulls solar power for home use

Overview

The Central Government's PM Surya Ghar: Muft Bijli Yojana 2025 aims to promote solar energy adoption across households by offering up to 40% subsidy for installing rooftop solar panels .

The Central Government's PM Surya Ghar: Muft Bijli Yojana 2025 aims to promote solar energy adoption across households by offering up to 40% subsidy for installing rooftop solar panels .

When you combine lower solar hardware costs with rising grid tariffs, payback periods tighten—especially for homes that consume 200–400 units a month and can run major daytime loads (fridge, fans, air-cooling, work-from-home equipment) on solar power. In 2025, rooftop solar has moved from a

Sun AP Ecopower, a recognized name in the Indian solar industry, is at the forefront of this movement, helping homeowners harness the power of the sun with efficient solar solutions tailored to Indian conditions. Solar energy is the energy generated from sunlight using photovoltaic (PV) cells.

Wood Mackenzie says in a new report that India's solar manufacturing boom risks overcapacity and calls for a shift from expansion to cost competitiveness. India's solar module manufacturing capacity is on course to surpass 125 GW in 2025, more than triple its current domestic market demand of.

Solar power is one of the smartest ways to power your house. It's clean, renewable, and increasingly affordable. With better tech, government subsidies, and increasing electricity costs, solar power for homes in India is more practical than ever. What Does "Solar Power to House" Mean?

It means.
