

A-Core Container

Industrial and commercial fully immersed liquid-cooled energy storage system

Overview

This system ensures efficient, safe, and long-lasting energy storage with liquid cooling technology, high-voltage lithium iron phosphate (LiFePO₄) chemistry, and seamless grid integration. Supports up to 10 parallel units, enabling flexible expansion from 216kWh to.

This system ensures efficient, safe, and long-lasting energy storage with liquid cooling technology, high-voltage lithium iron phosphate (LiFePO₄) chemistry, and seamless grid integration. Supports up to 10 parallel units, enabling flexible expansion from 216kWh to.

GSL Energy is a leading provider of green energy solutions, specializing in high-performance battery storage systems. Our liquid cooling storage solutions, including GSL-BESS80K261kWh, GSL-BESS418kWh, and 372kWh systems, can expand up to 5MWh, catering to microgrids, power plants, industrial parks.

From 60 kWh to 2 MWh, whether it's for large-scale industrial operations or small commercial settings, Lithium Valley's energy storage solutions offer a flexible and adaptable solution to meet the diverse needs of clients. This product is designed as the movable container, with its own energy.

GSL ENERGY's All-in-One Liquid-Cooled Energy Storage Systems offer advanced thermal management and compact integration for commercial and industrial applications. Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection.

LIVOLTEK's BESS-125kW/261kWh Liquid Cooling Energy Storage System stands out with its highly integrated all-in-one design, exceptional performance metrics, flexible scalability, and comprehensive safety protection. It delivers a high-return, low-levelized cost of energy (LCOE) smart energy storage.

Our commercial and industrial lithium battery energy storage solutions offer from 100kW to 30+MW. We have delivered hundreds of projects covering

most of the commercial applications such as demand charge management, PV self-consumption and back-up power, fuel saving solutions, micro-grid and.

In the rapidly evolving landscape of industrial and commercial (C&I) energy storage, finding a system that balances performance, durability, and cost-effectiveness is crucial. The 125kW/257kWh Liquid-Cooling C&I Energy Storage System launched by SLENERGY marks a new height in energy storage.
