Is there an inverter with adjustable voltage

Overview

The ODS-1500 is a series of single-phase sinusoidal DC/AC inverters that offer up to 1500W of active power with adjustable output voltage and frequency and input voltage range from 12Vdc to 110Vdc, allowing many possible input-output combinations. The output voltage can be monitored.

The ODS-1500 is a series of single-phase sinusoidal DC/AC inverters that offer up to 1500W of active power with adjustable output voltage and frequency and input voltage range from 12Vdc to 110Vdc, allowing many possible input-output combinations. The output voltage can be monitored.

I'm looking for an inexpensive inverter with adjustable low voltage cutoff. Does anyone know of one?

Needed for testing batteries @danphillips I suppose it depends on your definition of "inexpensive", but the Victron Phoenix 1200VA meets your other requirements at least. low-voltage cutoff fully.

GoodWe's new LVSMT-US string inverter for small C&I installations uses the same advanced string inverter technology as GoodWe's popular SMT-US series for medium- to large-scale C&I installations, that offers all the benefits of MLPE without the additional hardware. Providing extreme flexibility.

NTS-250P is a 250W highly reliable built-in type off-grid true sine wave DC - AC power inverter. Its key features include: digital design with MCU control, streamlined control circuitry . its ISLAND series of inverters, which is a high technology product, to anyone who needs AC where the.

A High power Railway & Industrial 260VA DC/AC Inverter, the OCS-260 series is composed of sinusoidal inverters of up to 260VA apparent power and is presented in a very compact format. We have the rail version (EN50155) and offer multiple mounting options. KEY FEATURES. Sine wave output voltage.

Addressing this gap, Voltas proudly presents its revolutionary Adjustable Inverter AC range, allowing users to switch between 1 Ton and 1.5 Ton capacities based on their needs. Picture this: On a scorching day or when a

crowd gathers in a room, you can use the 1.5-ton capacity for maximum cooling.

Sadly I've discovered a customizable low voltage shutoff is a rare feature. what would be an inverter I could buy that supports 60Hz 120V output (for US standards), that is 24V, supports at least a 2kW load, and has a customizable low voltage shutoff (to support lithium iron phosphate chemistry)?
