

## A-Core Container

# Island Liquid Cooling Energy Storage Enterprise

## Overview

---

It supports flexible scalability and rapid deployment—making it an ideal choice for industrial park peak shaving, island microgrids, emergency backup, etc.

**FEATURES** Up to 3 units in parallel. Max. 156kW PV input. Multi-level safety features. Plug and play. Intelligent remote.

It supports flexible scalability and rapid deployment—making it an ideal choice for industrial park peak shaving, island microgrids, emergency backup, etc.

**FEATURES** Up to 3 units in parallel. Max. 156kW PV input. Multi-level safety features. Plug and play. Intelligent remote.

The 100kW / 313kWh Liquid-Cooled Energy Storage System is engineered with advanced liquid cooling technology to ensure superior thermal management, enhanced system efficiency, and extended battery life. It supports flexible scalability and rapid deployment—making it an ideal choice for industrial.

GSL Energy is a leading provider of green energy solutions, specializing in high-performance battery storage systems. Our liquid cooling storage solutions, including GSL-BESS80K261kWh, GSL-BESS418kWh, and 372kWh systems, can expand up to 5MWh, catering to microgrids, power plants, industrial parks.

GSL ENERGY's All-in-One Liquid-Cooled Energy Storage Systems offer advanced thermal management and compact integration for commercial and industrial applications. Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection.

Our commercial and industrial lithium battery energy storage solutions offer from 100kW to 30+MW. We have delivered hundreds of projects covering most of the commercial applications such as demand charge management, PV self-consumption and back-up power, fuel saving solutions, micro-grid and.

Superior Cooling Efficiency – InnoChill's advanced liquid cooling technology rapidly dissipates heat, preventing thermal runaway and enhancing system stability. Energy & Cost Savings – Our innovative solutions reduce energy

consumption, leading to lower operational costs for data centers and.

The 3440kWh Containerized Energy Storage System with liquid cooling is an advanced solution for large energy storage needs. The system integrates high-performance lithium iron phosphate (LiFePO<sub>4</sub>) batteries and intelligent liquid cooling technology within a compact 20-foot container to deliver.
