Italian solar off-grid energy storage project

Overview

Nexta Capital Partners and Octopus Energy Generation have received Single Authorisation (Autorizzazione Unica) from MASE for a 50 MW battery energy storage system (BESS) in northern Italy. New report: “EU energy storage action plan needed”.

Nexta Capital Partners and Octopus Energy Generation have received Single Authorisation (Autorizzazione Unica) from MASE for a 50 MW battery energy storage system (BESS) in northern Italy. New report: “EU energy storage action plan needed”.

Rome, April 2025 – In a bold move to meet its EU-mandated greenhouse gas emissions targets, Italy is accelerating its renewable energy strategy under the Integrated National Energy and Climate Plan (PNIEC Italy). The government has set ambitious goals for increasing renewable energy on the national.

The Italian Ministry of the Environment and Energy Security (MASE) has approved a 50 MW battery storage project developed by Nexta Capital Partners and Octopus Energy Generation. Nexta Capital Partners and Octopus Energy Generation have received Single Authorisation (Autorizzazione Unica) from MASE.

So, you’ve probably heard the news: a major Italian energy storage project suspended its operations last month. Cue the collective groan from renewable energy enthusiasts. But why did this happen?

Was it technical hiccups, political drama, or something else entirely?

Let’s unpack this like a.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia. This move underscores the country’s growing commitment to grid resilience, energy.

According to data released last week by Italian solar energy association Italia Solare, Italy's independent energy storage installations surged in the first half of 2024, with a connected capacity of approximately 650MW, almost 10 times that of the same period in 2023. Matteo Coriglioni, head of.
