Kiribati DC screen inverter installation

Overview

How do I connect a DC inverter?

Connect the DC appliance to the load port of the controller if you want to power your DC appliance. 3. Connect the AC load to the output port of the inverter. (If you have many appliances, please just plug the AC socket to the inverter) 4. Turn on the inverter when the battery is full charged, then the system starts working.

How do I connect an off grid inverter?

1. Connect the off grid inverter to the battery (Polarity '+' to "+", "-" to "-") 2. Connect the DC appliance to the load port of the controller if you want to power your DC appliance. 3. Connect the AC load to the output port of the inverter. (If you have many appliances, please just plug the AC socket to the inverter) 4.

Are off-grid inverters sustainable?

In a world increasingly focused on energy independence, off-grid inverter have emerged as the cornerstone of sustainable power systems. Whether you're powering a remote cabin, a recreational vehicle, or a disaster-stricken community, proper installation is critical to ensuring reliability, safety, and efficiency.

How do I Commission the inverter?

Perform the commissioning steps as described in Commissioning the Installation on page 52. 1. Turn OFF the inverter ON/OFF switch, and wait until the LCD indicates that the DC voltage is safe (<50V), or wait five minutes before continuing to the next step. **WARNING!** discharge. **AVERTISSEMENT!**

How do I connect my inverter to the Monitoring Platform?

This communication option enables using an Ethernet connection to connect the inverter to the monitoring platform through a LAN. If using a cable longer

than 10 m / 33 ft in areas where there is a risk of induced voltage surges by lightning, it is recommended to use external surge protection devices. 1.

How do I configure a Master inverter?

3. Use the internal buttons to configure the connection. To set the inverter designated as master, select the following in the LCD menus: The system starts automatic detection of the slave inverters connected to the master inverter. The inverter should report the correct number of slaves. If it does not, verify the connections and terminations.
