Korean special energy storage battery

Overview

Who is Korea special battery?

In 1998, we successfully localized and developed silver oxide-zinc batteries for medium-weight torpedoes (White Shark). Korea Special Battery has made various attempts to advance forward. After changing our company name to “Korea Special Battery Co., Ltd.,” we continued our research while focusing on various technological developments.

Why is South Korea launching a 540mw battery energy storage tender?

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support renewable energy growth. Learn how this move strengthens both domestic resilience and global market leadership.

Will South Korea install 540 megawatts of battery energy storage systems?

The Ministry of Trade, Industry and Energy unveiled plans for a nationwide tender to install 540 megawatts of battery energy storage systems (BESS), marking the country's first major government-led deployment of its kind. The project is part of a broader effort to modernize South Korea's power grid and support the transition to renewable energy.

Does South Korea have a battery industry?

But South Korea's battery industry faces mounting pressure from China, whose manufacturers, led by CATL, currently account for nearly 90 percent of global energy storage battery capacity. CATL expanded its footprint in January by establishing a South Korean subsidiary, signaling an aggressive push into the local market.

Why should you choose Korea special battery?

Korea Special Battery has made continuous efforts for sustainable growth. In 2023, we obtained qualification as an equipment supplier for Korea's top 5

power generation companies (for chargers and uninterruptible power supply equipment) and are continuously conducting research and development to demonstrate even better technological capabilities.

What is Gyeongsan substation - battery energy storage system?

The Gyeongsan Substation - Battery Energy Storage System is a 48,000kW lithium-ion battery energy storage project located in Jillyang-eup, North Gyeongsang, South Korea. The rated storage capacity of the project is 12,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.
