Kosovo Portable Energy Storage Project

Overview

The Energy Storage Project, also known as BESS, is one of the pillars of the \$236 million MCC-Kosovo Compact Program. The project will introduce a state-of-the-art battery storage system and entails the largest energy investment in Kosovo during the last few decades.

The Energy Storage Project, also known as BESS, is one of the pillars of the \$236 million MCC-Kosovo Compact Program. The project will introduce a state-of-the-art battery storage system and entails the largest energy investment in Kosovo during the last few decades.

MCA Kosovo Launched the procedures for the Design and Build of Large-Scale Battery Energy Storage Systems Pristina, Kosovo – January 10, 2025 The Millennium Challenge Account (MCA) Kosovo has officially launched the pre-qualification process for the Design and Build of Utility-Scale Battery Energy.

The Prime Minister of the Republic of Kosovo, Albin Kurti, and the Minister of Economy, Artane Rizvanolli, today participated in the launch ceremony of the Prequalification for the Energy Storage Project through Batteries, which will be located in the cities of Ferizaj and Istog. In his opening.

Millennium Challenge Account Kosovo invited qualified companies to respond to the prequalification call for a battery storage project. The two lots are for 45 MW and 125 MW in operating power, with a duration of two hours. Challenge Compact in 2022. The project contributes to poverty reduction.

150MW Power Output: Enough to light up 150,000 homes during peak hours. Frequency Regulation: Acts like a “grid shock absorber” to balance supply and demand. Solar & Wind Integration: Stores excess renewable energy—no more wasted sunshine! Fun fact: Engineers initially debated naming the project.

sition to a cleaner energy future. The project includes supporting battery storage systems that will enable Kosovo's transmission system and market operator to cost-effectively smooth out imbalances in the electricity grid, supporting enefits to Kosovo's power system. Installing a 340 MWh battery.

Kosovo's new energy storage project is more than just infrastructure—it's a bridge to energy independence. With increasing global focus on renewable integration, this initiative positions Kosovo as a regional leader in clean energy transition. Let's unpack how this project aligns with modern.
