Kosovo hybrid power station

Overview

What is Kosovo a power plant?

Kosovo A Power Plant is an 800MW coal fired power project. It is located in Pristina, Kosovo. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in multiple phases. Post completion of construction, the project got commissioned in 1962. Buy the profile [here](#).

How many thermal power plants are there in Kosovo?

Kosovo's two existing thermal power plants, Kosova A and Kosova B, were built in 1963 and 1983, respectively. Despite a combined installed capacity of 1,478MW, the two plants have a current operational capacity of 915MW using 7.2 million tonnes (Mt) of coal a year.

Where will Kosova e Re Power Plant be built?

The Kosova e Re power plant will be built on a site located adjacent to the existing Kosova B TPP at Obiliq, Prishtina district. The site is accessible by road via the Durrës-Kukës highway, which runs 264km from Durrës to Pristina.

Will Kosovo a power station be refurbished by 2024?

In March 2023, Kosovo's new energy strategy until 2031 included plans to refurbish at least one unit of Kosovo A power station by 2024, in addition to both units of Kosovo B power station.

When will Kosova e Re Power Project start?

Construction works on the Kosova e Re power project are expected to be started in 2019, while commissioning is expected in 2023. The new plant is expected to generate enough electricity to meet approximately half of Kosovo's total energy demand, over its 40 years of estimated operational life.

How much electricity does Kosova produce?

Kosova A and B produce approximately 1,500GWh and 3,750GWh respectively on an average, together accounting for 75% of the country's electricity demand. A new power plant with an installed capacity up to 2,100MW to replace the ageing plant was proposed in 2006.
