Large-scale energy storage in Australia

Overview

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial commitment stage, according to the latest Clean Energy Australia Report 2025.

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial commitment stage, according to the latest Clean Energy Australia Report 2025.

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total reaching the financial commitment stage - delivering an extra 1.5 GW in storage capacity and 5 GWh in energy.

Finnish energy giant Wärtsilä has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh deployment that brings the company's total energy storage capacity in the nation to 5.5 GWh. The future of.

This marks the second-highest quarterly investment on record, delivering an additional 1.5GW in storage capacity and 5GWh in energy output. The report highlighted a 500% increase in investment commitments for renewable energy generation in 2024. Credit: Phonlamai Photo / Shutterstock. The first.

Australia is the third-largest market worldwide for large-scale energy storage by capacity and is blitzing the field in per capita battery storage installations, with more than 1 GWh per million people - double that of nearest rival the United Kingdom. In 2025, Australia surpassed the United.

In early 2025, over AUD 2.4 billion (USD 1.5 billion) went into large-scale battery energy storage systems (BESS). This was the second-highest quarterly investment ever, just behind the AUD 2.8 billion seen at the end of 2023. The Clean Energy Council's Quarterly (Q1 2025) Investment report shows.

EVE Energy has deployed its Mr. Giant 628 Ah battery storage system in Australia, delivering 5 MWh per container with parallel operation, safety management, and noise control under 65 dB to support renewable integration and grid stability. EVE Energy has achieved a significant milestone in its.
