# Latvian energy storage power station project construction

## Overview

---

Latvia's transmission system operator Augstsprieguma tīkls (AST) has commissioned two utility-scale battery energy storage systems (BESS) in Rēzekne and Tume, describing the milestone as the final step in synchronizing the Baltic power grids with continental Europe.

Latvia's transmission system operator Augstsprieguma tīkls (AST) has commissioned two utility-scale battery energy storage systems (BESS) in Rēzekne and Tume, describing the milestone as the final step in synchronizing the Baltic power grids with continental Europe.

SUNOTEC, one of Europe's leading renewable energy development and construction companies, has acquired 100% of the share capital in SIA DSE Lazas Solar from Danish greenfield developer Danish Sun Energy ApS to build a new PV solar power plant with a total capacity of 400 MWp (megawatts DC) with a.

On July 13th, SUNOTEC, a well-known European renewable energy service provider, officially completed the acquisition of SIA DSE Lazas Solar's solar and energy storage project in Latvia. The project is located in the Cīrava area of Dienvidkurzeme, Latvia, and plans to construct a 400 megawatt peak.

Independent power producers (IPPs) Greenvolt and European Energy have finalised financial deals for solar-plus-storage projects in Denmark and Latvia, with the former raising funds from Ringkjøbing Landbobank and the latter divesting from its project. Ringkjøbing Landbobank has agreed a €35 million.

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the country's transmission system operator. Meanwhile, Estonia is advancing two major BESS projects, backed with.
