Latvian wind power system imports

Overview

What is WindWorks in Latvia?

The "WindWorks. Powering Latvia's energy future" event is a hybrid wind energy conference that brings together experienced international energy experts, stakeholders, and policy makers to discuss the future of wind energy in Latvia.

How does wind energy work in Latvia?

Sun constantly creates an air flow in the atmosphere - wind - which captured can be used to produce electricity. Harnessing wind doesn't require any kind of extraction, transportation or combustion of any raw material. The source of wind energy is inexhaustible. And the good news is that wind is available in large quantities in Latvia. Eco friendly.

Does Latvia have an offshore wind farm?

Yes, Latvia has an offshore wind farm, as it is part of the joint project of the Latvian and Estonian offshore wind farm, which is included in the Latvian National Energy and Climate Plan for 2030.

Is wind available in Latvia?

And the good news is that wind is available in large quantities in Latvia. Eco friendly There is no hazardous waste during the operation of the wind farm. Wind turbines operate by the wind turning the blades, which then rotate the shaft that is connected to the generator where the electricity is generated.

What is the EU's energy policy for Latvia?

The current EU policy dictates that Latvia must increase the share of renewable energy in its final energy consumption and Latvia has plans to reach 50 percent by 2030 according to the EU's National Energy and Climate Action Plan 2030. Much of Latvia's heat and electricity still comes from imported natural gas.

How can Latvia reduce its reliance on foreign sources of energy?

The Latvian government is interested in diversifying supplies and in developing more local resources to reduce the country's reliance on foreign sources of energy. To reach these targets, government agencies and entrepreneurs have discussed options to move beyond hydropower into wind and biomass power plants.
