

A-Core Container

Lebanon base station room EMS standards

All In One

Integrating battery packs

Intelligent Integration

integrated photovoltaic storage cabinet

High-capacity

50-500kWh

Rated AC Power

50-100kW

Degree of Protection

IP54

Altitude

3000m(>3000m derating)

Operating Temperature Range

-20~60°C(Derating above 50 °C)

Overview

What emergency services does Lebanon fire provide?

Lebanon Fire is fully equipped to provide a range of essential emergency services including: Fire Response, Medical Calls, Water Rescue, High Angle Rescue, and Trench Rescue. To ensure the highest level of service, the Lebanon Fire Department places significant emphasis on fire safety and emergency response training for our personnel.

Should a fire and EMS Station serve as a model?

In each of these areas, the fire and EMS station should serve as the model for the community. As with any public or private facility, fire and emergency services stations are subject to theft, vandalism and violence. For staffed stations, these acts are most likely to occur when emergency response personnel are on a call.

How should EMS operations be organized?

EMS operations shall be organized to ensure the fire department's capability and includes members, equipment and resources to deploy the initial arriving company and additional alarm assignments. Authority-Having Jurisdiction (AHJ) should determine if Fire Department provides BLS, ALS services, and/or transport.

Do EMS stations need a specific space?

Carve out specific spaces for specific uses Of course any EMS station needs adequate sleeping quarters, bathroom facilities and locker/changing rooms for both men and women - but consider what other activities happen at your station that you may not currently have a specific place for.

How can EMS station design improve community relations?

Public areas within police stations, including reception and interview rooms, play a critical role in community relations. These spaces need to be welcoming

yet secure, balancing transparency with the need for confidentiality. In EMS station design, workflow efficiency is paramount.

What makes a good EMS station design?

Proper storage and easy accessibility of medical equipment are vital in EMS stations. Design solutions include modular storage systems that can be easily adjusted to accommodate different types and sizes of equipment. Achieving hygienic and sterile environments is a cornerstone of EMS station design.
