Lithuania energy storage power station investment

Overview

Why are battery energy storage systems important in Lithuania?

“Power generation from renewables is growing in Lithuania, which makes battery energy storage systems an important guarantee of [grid] reliability,” said Ignitis Group CEO Darius Maikštėnas.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

Will Ignitis install a battery energy storage system in Vilnius?

Vilnius-based utility Ignitis Group will install 291 MW/582 MWh of total battery energy storage system (BESS) capacity at two of its wind farms and at a hydro site, with commercial operation expected in 2027.

Which are the biggest power stations in Lithuania?

The following page lists the biggest power stations in Lithuania: Ignalina Nuclear Power Plant (two RBMK reactors, decommissioned in 2009, located at 55.6055297, 26.5624094), Elektrėnai Power Plant (located at 54.7697761, 24.647913), Klaipėda Geothermal Demonstration Plant (located at 55.6844741, 21.2017894), and Kaunas Hydroelectric Power Plant (located at 54.8739893, 23.9994836).

Who is supplying BESS power in Lithuania?

Lithuanian utility Ignitis Group has announced plans to develop 291 MW/582 MWh of BESS capacity at three of its clean energy sites and said the equipment will be supplied by Germany-based Rolls Royce Solutions GmbH.

Why is Lithuania investing in energy import routes independent of Russia?

Since the reestablishment of its independence, Lithuania has been investing in energy import routes independent of Russia. These included the development of the Būtingė oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipėda LNG terminal and the Gas Interconnection Poland–Lithuania.
