

A-Core Container

Malawi solar combiner box manufacturer

Overview

What is a solar combiner box?

A PV combiner box combines multiple strings of solar panels into one main output circuit. It's essential for any solar installation with multiple strings as it provides overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar system. How do I know which voltage level to choose?

Who is letop solar combiner box manufacturer?

We are LETOP, a professional Solar Combiner Box manufacturer. We have been deeply involved in the industry for 15+ years. With excellent R&D strength and advanced production technology, we provide high-quality and high-performance photovoltaic combiner box & related components to global customers.

How many string configurations can a combiner box support?

The combiner box supports a maximum of 24 string configurations, it is suitable for 1500V DC system voltages. It features industrial-level protection design, including string monitoring, RS485 bus/standard MODBUS-RTU protocol, arc fault detection, and fast shutdown/fireman switch functions.
