# Mali 5G communication base station wind power solution

## Overview

---

What is tztsai - energy-efficient 5g-rl?

GitHub - tztsai/Energy-Efficient-5G-RL: This repository presents a multi-agent reinforcement learning approach for energy-efficient collaborative control of base stations in 5G networks. Cannot retrieve latest commit at this time.

Can EMC communicate with a 5G network?

However, the communication operator builds the BS to complement the 5G signal, and the establishment of a communication BS does not mean the establishment of a dedicated power wireless network. EMC can also communicate by accessing a normal 5G network but at a reduced reliability and transmission rate.

Are cellular base stations a future-proof power model?

Debaillie, C. Desset, and F. Louagie, "A flexible and future-proof power model for cellular base stations," in IEEE 81st Vehicular Technology Conference (VTC Spring), 2015, pp. 1-7. S.

How many 5G Bs are there in China?

China has deployed 690,000 5G BSs, and the number of terminal connections exceeds 180 million.
