Mobile battery storage in New Zealand

Overview

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. On January 10, 2023, Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

What is a battery energy storage system?

What is a BESS?

A Battery Energy Storage System (BESS) is an energy storage system that uses a group of batteries to store electrical energy from the grid and renewable projects such as solar and wind farms. It's an electrochemical energy storage device, much like the battery found in your phone, just on a much larger scale.

Can battery technology save energy in New Zealand?

transferring and using energy. In New Zealand, our hydro lakes store energy on a large scale. However, until now we have had limited options to store electricity cost-effectively close to where it is used. Around the world, battery technology now offers opportunities to store electricity economically.

Can batteries be used in New Zealand?

in cost of system. CASE STUDIES We researched the applications where batteries could be used in New Zealand, and the additional services they might realistically provide. Of all potential options, we have fully developed the five most useful (and economically promising) as case studies, using the revenue and cost assumptions outlined.

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Are battery storage solutions customisable?

Battery storage solutions from TITAN are highly customisable. We are able to configure battery systems to your exact requirements and modify other elements to meet your needs. As standard, our battery storage solutions have a waterproof rating of IP54 and come with inbuilt liquid cooling.
