# Moldova power station energy storage profit model

## Overview

---

Rapid growth of intermittent renewable power generation makes the identification of investment opportunities in energy storage and the establishment of their profitability indispensable. Here we first present.

What is the storage capacity of petroleum products in Moldova?

Moldova's total storage capacity for petroleum products is over 150 000 m<sup>3</sup>, including state and industry storage but excluding the army's. In addition, the Giurgiulesti terminal has eight tanks for petroleum product storage with capacity of 63 600 m<sup>3</sup> at its disposal.

Does Moldova have a power system?

Although Moldova is interconnected with Romania, the two systems do not operate in parallel but can function together in island mode (four islands can be created). Romania's power system is part of ENTSO-E, and Moldova is currently working towards full synchronisation.

How does Moldova's electricity system work?

Moldova's electricity system operates synchronously with Ukraine's, and the neighbouring systems are interconnected by 11 lines of 110 kV and 7 lines of 330 kV. Although Moldova is interconnected with Romania, the two systems do not operate in parallel but can function together in island mode (four islands can be created).

Are there gas storage facilities in Moldova?

There are no gas storage facilities in Moldova and no access to liquefied natural gas (LNG). Domestic gas production meets less than 0.01% of demand, and until the end of 2016 Valiexchimp had been the only company to explore and exploit gas and oil in southern Moldova. None. None. None.

What are business models for energy storage?

Business Models for Energy Storage Rows display market roles, columns reflect types of revenue streams, and boxes specify the business model

around an application. Each of the three parameters is useful to systematically differentiate investment opportunities for energy storage in terms of applicable business models.

Is energy storage a profitable business model?

Although academic analysis finds that business models for energy storage are largely unprofitable, annual deployment of storage capacity is globally on the rise (IEA, 2020). One reason may be generous subsidy support and non-financial drivers like a first-mover advantage (Wood Mackenzie, 2019).
